EDUCATION

ENSTA | Engineering Degree, Class of 2028 2025 – Present
Brest, France | *Institut Polytechnique de Paris*

Preparatory Classes for Engineering Schools | MPSI, MP
Mathematics and Physics
Janson-de-Sailly, Paris, France 2024 – 2025
Louis Pasteur, Neuilly, France 2022 – 2024

WORK EXPERIENCE

Operator Internship | FPBois Jan 2026 (1 month)
Mimizan, France

- Operated a lumber-stacking machine and proposed adding spikes at specific locations to improve its operation.

SKILLS

Programming: Python, Rust, C++, JavaScript, OCaml, Bash
Web and Documents: Flask, HTML, CSS, LaTeX
Scientific Computing and Data: CuPy, scientific Python libraries, SQLite
Tools: Linux, Git, Hermes, Ollama, Vim

PROJECTS

Schwarzschild Black Hole Simulation

- Developed a real-time ray-tracing simulation using Python, CuPy and Rust.
- Independently studied general relativity using textbooks by Bernard F. Schutz and Sean M. Carroll.

Pollutant Diffusion in Rivers | Research Project (TIPE)

- Studied pollutant transport in river flows by implementing Langevin's equation in a fluid simulation using the Lattice Boltzmann method.

ImGoaTeX | Presentation Language Written in Python

- Built an alternative to LaTeX's *Beamer* package that compiles presentations to a single portable HTML file, with videos, GIFs and slide animations.
- Developed and self-hosted a web editor for writing and compiling ImGoaTeX documents in the browser.

LEADERSHIP EXPERIENCE

President, ENST'EIN | ENSTA Brest 2026 – Present
Student club where students give talks on subjects they are passionate about, often scientific.

LANGUAGES

English: Fluent (TOEIC: 940/990) **Spanish:** Intermediate
French: Native **Chinese:** Beginner
